

Rolled Products

At Scott Precision wire our metals can be supplied in tape or strip form. In-house tape rolling allows us to batch select metals to provide the right characteristics for our customers. This can include specific emf profiles for thermocouple tapes or particular mechanical properties.

Tapes are layer wound onto customer specified reels and strip is normally delivered in coils after undergoing in-house inspection for the required characteristics.

Tape Rolling

The alloys available for supply in tape or strip include:

Cromaloy 1	Cumin 11
Cromaloy 3	Kutherm 3
Cromaloy 4	Kutherm 10
Cromaloy 5	Nickel Iron 70/30
C3020	Nickel Iron 52/48
Copper Nickel 98/02	Pure Nickel
Copper Nickel 94/06	2% Manganese Nickel
Copper Nickel 90/10	Cupronic 2.5
Copper Nickel 85/15	Cupronic 12
Copper Nickel 80/20	Nicro+
Copper Zinc 95/05	Nial-
Copper Zinc 80/20	Nicrosil
Copper Zinc 64/36	Nisil
Constantan	

Information contained within this technical data sheet is based upon the general experience of Scott Precision Wire Ltd and is believed to be correct at the time of issue. No warranty is given or is to be implied from the details above. Customers are advised to carry out independent tests in order to determine the suitability of any Scott Precision Wire Ltd product for an application.
